CONDEMNATION of PUTIN's CRIMINAL BEHAVIOR -- Our Institute and our members are universally aligned in our denunciation of Putin's despicable Hitlerian behavior and unconscionable aggression against a peaceful country.

Putin is an International Criminal and Terrorist -- we call for the International Court to convict him of war crimes, wantonly killing innocent civilians.

Putin is a Predator -- we call upon NATO and the European Union to take immediate action to create a Deconfliction Zone in Western Ukraine to create a humanitarian safe harbour for Ukrainians, and to supply Ukrainian Warriors to drive out an abominable enemy with no conscience.

We support all the Freedom Fighters willing to risk their lives for democratic principles of self-determination.

We stand behind the International Sanctions against the Russian government, and give our sympathy to all the innocent Russian citizens who suffer the unintended consequence of Russian aggression. This is your chance to put Putin out of power.

We extend our Deepest Compassion for the innocent people of Ukraine who have been murdered, forced to become refugees, and hover in fear of their lives.

We can learn a lot about Collaborative Leadership by examining the courage of Ukrainian leaders. In a larger sense, it's time we look at the whole nature of how we enable our leaders, both in the public and private sectors.

The central issue is one about of who is trustworthy? Ultimately this boils down to a matter of Character and Courage.

Boards of Directors of Corporations have focused too little on placing leaders of good character in the C-Suite. The same goes for Citizens in Democracies who vote for politicians whose character is not worthy of the garbage bag.

To learn more about Predators & Dominators -- how to spot them & neutralize their power -- see [Beware the Authoritarian Dark Triad](#) to understand what's inside Putin's Mind
